

Muhammad Saad

Flutter Developer

+923701537214 | muhamdsaad.dev@gmail.com | Gujranwala, Pakistan | [LinkedIn](#) | [GitHub](#)

SUMMARY

Flutter Developer with hands-on experience building cross-platform mobile applications for Android and iOS. Proficient in Flutter, Dart, state management (Provider & Riverpod), Firebase, and RESTful API integration. Experienced in full-stack development with Node.js, Express, and MongoDB — including building secure backends with rate limiting, server-side token handling, and REST API design. Proven ability to deliver clean architecture across both mobile and backend layers.

EDUCATION

Bachelor of Science in Software Engineering, University of Gujrat (GPA: 3.3)

Nov '22 — Jun '26
Gujrat, Pakistan

EXPERIENCE

Flutter Developer Intern

Mar '26 — Apr '26

DevelopersHub Corporation©

Islamabad, Pakistan (Remote)

- Refactored state management logic across production Flutter features, reducing UI performance issues by 40% and improving overall app responsiveness by 30%.
- Integrated RESTful APIs and Firebase with structured error handling, eliminating 80% of QA-stage crashes and achieving zero data loss across app restarts.
- Implemented clean architecture patterns, improving development efficiency by 20% and long-term codebase maintainability.
- Accelerated feature delivery by 15% by integrating third-party libraries and local persistence solutions into the development workflow

PROJECTS

VenueMate, | Flutter, Firebase, Google Maps API [Link](#)

Sep '25 — Apr '26

- Developed a multi-role venue booking application supporting Administrators, Hall Managers, and Customers with role-based access control (RBAC).
- Integrated Firebase services and Google Maps API to enable secure authentication, real-time data management, and location-based venue discovery across 50+ listed venues.
- Designed an end-to-end booking and payment verification workflow, reducing double-booking risk and manual coordination overhead by over 70%.

DevLens, | Flutter, Node.js, Express, GPT-4o Mini, Riverpod [Link](#)

Mar '26 — Apr '26

- Built an AI-powered code review application supporting 37 programming languages with automated feedback, bug detection, and optimization suggestions.
- Developed a secure Node.js backend with API rate limiting (5 requests per 60 seconds) and server-side credential management for AI service integration.
- Applied Riverpod state management and clean architecture principles to create a scalable and maintainable application structure.

SKILLS

Mobile Development: Flutter, Dart, Android & iOS Development

State Management: Provider, Riverpod

Backend & APIs: Node.js, Express.js, REST APIs, JSON Parsing

Databases & Cloud Platforms: Firebase (Auth, Firestore, Storage, FCM Push Notifications), MongoDB, SQLite, Hive, Google Maps API

UI/UX & Architecture: Clean Architecture, Responsive & Adaptive Layouts, Figma to Flutter

Tools & Practices: Git, GitHub, CI/CD, Postman, Android Studio, Agile/Scrum, Performance Optimization

Languages English, Urdu

CERTIFICATIONS

[Getting Started with Git and GitHub](#), IBM
